

Mortise latch bolt lock model 807 squared

Adjustable; 110 x 24 mm

Product description

Mortise latch bolt locks for model series 807 are tested in accordance with applicable regulations and are approved as suitable mating components for electrical locking systems in doors along escape routes.

The latch bolt is adjustable from 11,5 mm to 17 mm (projection). This means that it can be adapted to the door gap on site thus ensuring actuation of the monitoring contact.

Overview of Advantages

- Adjustable latch bolt stroke directly on the latch or on the rear side of the housing (Torx 8 adjusting screws)
- Integrated noise attenuating

Note

- Faceplate 110 x 24 mm
