

Power supply

14.8 V, 160 mA

Product description

EX-i mains adapter EX1003-15-----00 has an input voltage (auxiliary power) of 85 to 230 V AC. The output voltage is 14.8 V DC. This EX-i power supply is an intrinsically safe power supply unit, is part of the approval and is absolutely necessary for the operation of the EX electric strike!

For 1 EX electric strike, 1 unit power supply required.

Overview of Advantages

- Output intrinsically safe (EX ib) IIC/IIB
- Stable adjustable output voltage
- Galvanic separation between output and auxiliary power
- Auxiliary power 24 V AC / DC or 85 ... 230 V AC
- Compact design

Note

- The electric models of the ATEX door strikes only be cetricied with the power supply given below.
