

## E5CC-RX2ABM-000

Temperature controller, 1/16DIN (48 x 48mm), 1 x relay output, 2 x auxiliary relay outputs, universal input type, 100-240 VAC

# Műszaki jellemzők

|                          |                                                                    |
|--------------------------|--------------------------------------------------------------------|
| Size                     | 1/16 DIN (48 x 48 mm)                                              |
| Functions                | ON/OFF control, PID control                                        |
| Number of control loops  | 1                                                                  |
| Temperature input type   | B, C (WRe5-26), E, J, JPt100, K, L, N, P (PLII), Pt100, R, S, T, U |
| Linear analog input type | 0 to 10 V, 0 to 20 mA, 0 to 5 V, 1 to 5 V, 4 to 20 mA              |
| Temperature range        | -200-2300 °C                                                       |
| Number of event inputs   | 0                                                                  |
| Number of alarm outputs  | 2                                                                  |
| Supply voltage AC        | 100-240 V                                                          |
| Control output           | Relay                                                              |
| Terminal type            | Push-in                                                            |

## Kiegészítők

E58-CIFQ2

E5CB & E5CC and E5EC\* accessory, quick link programming cable, allows direct USB connection without requirement for communications card or power supply. Also the display will be powered (CX-Thermo v4.4 is needed). \*For E5EC front connection.

EST2-2C-MV4

CX-Thermo, direct 1 to 1 connecting software (1 to several if same TC type), for programming and monitoring E5\_N (version 5 & 6), E5ZN and CelciuX (EJ1)
