

SHF 2000

{SHF 2000-7000}

PRODUCT-NO.: 200175

SHF storage heater – high on heat, low on space.

The SHF models are distinguished by their particularly high heating output and low space requirement. With their impressive heat retention capacity, the storage heaters can bridge even long breaks between charging and, in particular, make use of surplus power. With the aid of the integral controller, the room temperature can be controlled precisely using the 7-day timer. If the room is ventilated, the heater switches off automatically.

The main features

Compact, freestanding storage heater with a high heating output

2.0 kW connected load

Integral RT controller with 7-day timer and open window detection

Easily accessible controls with backlit LCD

Long service life

Extremely quiet operation due to low noise crossflow fan
